

Свойства

4 независимых канала

до 11.2Gbps на канал

1310nm DFB лазеры

до 10км на одномодовом оптическом кабеле

цифровая диагностика (DDMI)

MTP/MPO коннектор

Применение

40G Ethernet 40Gbase-LR4

4 x 10G Ethernet 10Gbase-LR

Notes:

1. GND is the symbol for single and supply(power) common for QSFP modules, All are common within the QSFP module and all module voltages are referenced to this potential otherwise noted. Connect these directly to the host board signal common ground plane. Laser output disabled on TDIS >2.0V or open, enabled on TDIS <0.8V.
2. VccRx, Vcc1 and VccTx are the receiver and transmitter power suppliers and shall be applied concurrently. Recommended host board power supply filtering is shown below. VccRx, Vcc1 and VccTx may be internally connected within the QSFP transceiver module in any combination. The connector pins are each rated for maximum current of 500mA.
