QSFP28.100G.CWDM4-2

QSFP28, 100G, CWDM4, 2km, 2xLC

Особенности:

- Supports 103Gbps
- Single 3.3V Power Supply
- Power dissipation < 3.5W
- Up to 2km over SMF
- 4x25G electrical interface
- Duplex LC receptacles
- Commercial case temperature range of 0°C to 70°C
- 4*25Gbps DFB-based CWDM transmitter
- PIN and TIA array on the receiver side
- I2C interface with integrated Digital Diagnostic Monitoring

Области применения:

- 100G CLR4 applications with or without FEC

Part No.	Dat a	Fiber	Distance *(note2)	Interface	Temp.	DDMI
QSFP28.100G.CWDM4-2 *(note1)	103Gbps	SMF	2km	LC	0°C~+70°C	Yes

Note1: also support 103Gbps Note2: Over

SMF

Absolute Maximum Ratings

Parameter	Symbol	Min.	Max.	Unit
Storage Temperature	Ts	-40	+85	°C
Supply Voltage	Vcc	-0.5	3.6	V
Operating Relative Humidity	RH	5	85	%
Receiver Damage Threshold, per Lane	Rxdmg	5.5		dBm

^{*}Exceeding any one of these values may damage the device permanently.

Recommended Operating Conditions

Parameter	Symbol	Min.	Typical	Max.	Unit
Operating Case Temperature	Tc	0	25	70	°C
Power Supply Voltage	Vcc	3.135	3.3	3.465	V
Power Dissipation	P _D			3.5	W

^{*}The product image only for reference purpose.

Note3: Average launch power, each lane (min) is informative and not the principal indicator of signal strength. A transmitter with launch power below this value cannot be compliant; however, a value above this does not ensure compliance.

QSFP28.100G.CWDM4-2

Note4: Even if the TDP < 1.0dB, the OMA (min) must exceed this value.

Note5: TDP does not include a penalty for multi-path interference (MPI).

Note6: Transmitter reflectance is defined looking into the transmitter.

Note7: With FEC hit ratio of 5x10⁻⁵, Without FEC hit ratio of 1x10⁻¹².

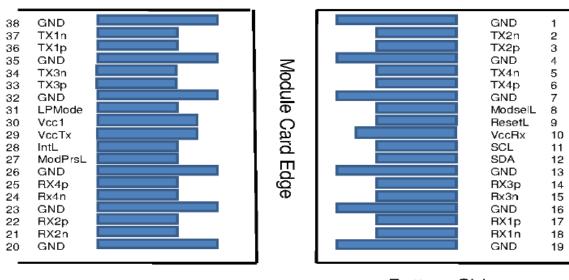

Note8: Average receive power, each lane (min) is informative and not the principal indicator of signal strength. A received power below this value cannot be compliant; however, a value above this does not ensure compliance. Note9: With FEC sensitivity is specified at 5x10⁻⁵ BER, Without FEC sensitivity is specified at 1x10⁻¹² BER. Note10: With FEC measured with conformance test signal at TP3 for BER = 5x10⁻⁵, Without FEC measured with

conformance test signal at TP3 for BER = $1x10^{-12}$.

Note11: Vertical eye closure penalty, stressed eye J2 Jitter, stressed eye J4 Jitter are test conditions for measuring stressed receiver sensitivity. They are not characteristics of the receiver.

Note12: Vertical eye closure penalty, stressed eye J2 Jitter, stressed eye J9 Jitter are test conditions for measuring stressed receiver sensitivity. They are not characteristics of the receiver.

^{1:} GND is the symbol for signal and supply (power) common for the QSFP28 module. All are common within the QSFP28 module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.

^{2:} Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently. Requirements defined for the host side of the Host Edge Card Connector are listed in Table 6. Recommended host board power supply filtering is shown in Figures 3 and 4. Vcc Rx Vcc1 and Vcc Tx may be internally connected within the QSFP28 Module in any combination. The connector pins are each rated for a maximum current of 500mA.
